Timeline

How it works?

Step 1: Connect

Customer's voice agent

Step 2: Test&Monitor

Hamming Platform

Simulated load testing

Production monitoring

50+ eval Metrics

Step 3: Deliver

Bug Catches

Real-time Alerts

Compliance reports

Sumanyu Sharma (Co-Founder & CEO)

- LFormer Head of Data at Citizen; ex-Senior Staff Data Scientist at Tesla
- Scaled ML systems driving \$100M+ revenue
- Built production-grade AI systems in high-stakes environments

Platform consolidation

Primary path: **Strategic acquisition by voice AI platform or enterprise contact center player (Cisco, Twilio, Datadog)**

Risks & Mitigants

RISKS

MITIGANT

Platform in-house bundling threat

Cisco/Webex partnership validates

TAM ceiling

Expansion into chat + agent QA

Commoditization of LLM evals

Voice-specific moat is defensible

Small team / key-person risk

YC network + \$3.8M runway
